

# ÖKK SMILE

## The dental insurance with predictable costs

### Well protected, reliably insured

Healthy teeth are important, as are regular visits to the dentist. ÖKK SMILE ensures that the necessary treatment does not exceed your budget and that costs remain predictable. The insurance covers dental treatments such as prophylaxes, check-ups, prosthetic preventative measures and orthodontic treatments. The treatment must take place in Switzerland or one of its neighbouring countries. With ÖKK SMILE supplementary insurance, you only have to wait six months before you are entitled to benefits. The qualifying period for prosthetic preventative measures, such as crowns, bridges, dentures, pivot teeth and orthodontic treatments, is twelve months.

### The following insurance options are available:
